

# **The Seed of the Universe.**

## **By Herman (Dusty) Rhodes.**

### **Introduction.**

When I started this book back in 1987, I had no idea that it would be going on strong for the next thirty years. It's taken from the Hebrew and Greek text from the Bible as well as the current events in science.

I have 150 airbrush and Photoshop illustrations and explanations that will walk you step by step through God's creation of the universe and life, all in layman's terms. It starts before solid matter was created and explains how God started with his physical laws of truth, (Physics, Chemistry, Math, etc.) and totally empty infinite space. It has answers to many unanswered questions, both Biblical and scientific. By understanding his laws in microscopic detail, God understood perfectly how to create the universe and life. God was the first scientist, and the universe and life was his project. The Bible says that he created it for his own pleasure.

We are the first generation in the history of the world that can understand the Creation. Thanks to God opening the mind of science in our generation, we can actually see what the writers of the bible were trying to explain 3500 to 2000 years ago.

I can't speak Hebrew or Greek, but I used Strong's concordance to look up every major word in the First chapter of Genesis, Proverbs 8:22-31, and John 1:1-5. By looking among the definitions to every major word, I found another set of definitions that tell a modern-day story that fit with what we see with our space telescopes in our generation. These are definitions that describe the word meaning to these Biblical Hebrew and Greek words.

The question that I would like to ask the world is, "How did the writers of the Bible know what to write that long ago?" Only God knew the answers, so that shows that the writers were inspired by God.

**I once thought that this was just my** interpretation of the creation. So far, I have never seen a story, either Biblical or scientific that will walk you step by step through the creation. ... Wonder why? ... This new word meaning opens new doors to the knowledge of Bible study and the current events in science over the past 30 years. **Now I understand that this book is strictly Biblical and not just an interpretation.**

I hope that you enjoy reading it as much as I have enjoyed writing it. It's a story for our generation.

## Book Explanation,. 3-16-20

### The Writing.

Welcome to my pages. For the past 30 years, I have been tied up in my book, The Seed of the Universe. It's a story of Biblical creation, but more than likely, not what you have ever heard. The reason being, it was taken from the Biblical Hebrew and Greek text and not from a translation. The Biblical Hebrew and Greek text is the Bible. The translation of King James is what 52 men from England THOUGHT that the writers of the Bible\_\_ said. That translation was made over 400 years ago when no one knew what was in the universe. All that they could see was the sun and the moon and the night sky.

To my understanding, they went through the definitions of every word just like I did. However, when they saw the right definitions for the creation, they didn't understand them, so they chose the definitions that they THOUGHT was right, but were \_\_ the wrong definitions (I'm speaking about the creation text).

The Hebrew language does not have as many words as the English language. Therefore, there are more definitions for each word. You have to translate it by understanding the surrounding text. I took the time to look up every major Biblical word that I could find with Strong's Concordance that told about the creation of the universe and life. Then, I went through every definition listed in the concordance. I started to find definitions that fit with what we see with the space telescopes. Then I searched for all of the modern-day definitions. Would you believe that they were all there, word by word, in perfect order? The big question is, how did the writers who lived 3500 years ago know what to write about the creation when all that they could see was the sun and the moon and the night sky? They were inspired by God just like the Bible teaches. God was the only one that knew what went on that long ago and gave them a detailed outline of his creation.

Keep in mind that this is MY UNDERSTANDING of my 30 years of study in both the Bible and the current events in science. It does not mean that all that I have put together is written in stone, but what I have found shows that what the writers wrote

thousands of years ago fits with what we see in our own generation.

My advice to anyone who reads what other people say is to read the Bible for yourself and see what the writers said because they were inspired by God to write the Bible. Some people might try to make you THINK that they understand the Bible completely, but I sometimes wonder if anyone does. The Bible is compressed knowledge and my logic says that we don't have enough time in our lives to understand it in complete detail. The translators did the best as they could to make a perfect translation.

There was a time in my youth that I thought the translation of King James was the Bible. There's a lot of Christians who think that it is a Divine translation and will get highly upset at anyone who says anything different. I have been kicked off of a few Christian chats for trying to explain that there are mistakes in the KJV. That's why you need to read it for yourself and find the time to see what the Biblical text is saying. Just remember that the Biblical Hebrew and Greek text is the Bible and not any of the translations. It would be a blessing to you to read this book, then pass it on to your

friends then their friends. This is a story for our generation and could not have been completely understood before 2018. When I started it in 1987, It was completely new to the majority of the world. Remember too, that science is not all wrong. Some of them are atheists and hate anything that's said about God. Some are antichrists from other religions, but some are Christians. The ones who are Christians write some very interesting articles. Because the majority of the scientific theories are wrong doesn't mean that their discoveries are not right, but be careful about what they try to preach. They are trying their best to say that the universe evolved by Chance. Chance does not contain the laws of physics or any DNA information. Our universe is fine-tuned and governed by the laws of Physics which have been proved to be true, and they are a part of God. I have my complete book on my Website in the PDF format. There is an icon for each chapter, read it, download it, or print it off. It's my personal gift to you or anyone else on the earth. Enjoy <http://www.infinitestructure.com> /

## **Time allowed to Read Each Chapter Aloud by the Computer.**

**. Chapter One, ... 34 minutes.**

**. Chapter Two, ... 15 minutes.**

**. Chapter Three, ... 41 minutes.**

**. Chapter 4A & 4B, ...26 minutes.**

**. Chapter 5A & 5B, ...18 minutes.**

**. Chapter Six, ... 9 minutes.**

**. Chapter Seven, ... 8 minutes.**

**. Chapter Eight, ... 3 minutes (mostly the Biblical text and definitions. The Biblical text is all in photographs so they will not read aloud).**

- . Chapter Nine, ... 0 minutes (Biblical Text, all photos).
- . Chapter Ten, ... 14 minutes (Biblical text photos and ending).
- . Total reading time ... Two hours and forty-five minutes. This is not counting the time to study the illustrations or the Biblical Text. (The Biblical text is in chapters 8,9, and 10.)
- . These chapters were added to show the Biblical Hebrew and Greek definitions to the Biblical words written by the writers of the Bible, not by the translators of the different translations. These are the definitions that this book is taken from. The Biblical text is in Photos and will not read aloud.

## For the Blind,. (or people who hate to read).

- . 1 ...To “Read Aloud”, open the document in Microsoft Edge,  
... Find your page and click on the “Read Aloud” Icon.

- . 2...If you can see the illustrations, click on the “Pause” button, then scroll till you find the illustration. After the study of the illustration, click on the “Play” button to continue hearing the audio of the document.

Notice, ... I use the HTML version of Microsoft Edge. It has a simple read aloud feature. I installed the new version and could not get the read aloud feature to work, but maybe you

can. If not the Old Version has a simple read aloud feature. There might be other ways to read aloud that I have never explored yet.

## The Seed of the Universe

This is an illustrated interpretation of the Hebrew and Greek text of the Biblical creation. It is also taken from the current events of science.
